- Figma
- User Research
- Wireframing
- Prototyping
- Visual Design
- Design Systems
- FigJam
- Photoshop (Basic)

PROFILE

UI/UX Designer with a background in software development and one year of professional development experience. Skilled in designing intuitive, user-centered digital products by combining design thinking with technical knowledge. Experienced in wireframing, prototyping, responsive interface design, and building scalable design systems in Figma. Passionate about creating meaningful user experiences that solve real problems while balancing user needs with business goals.

WORK EXPERIENCE

- **Web Developer** 2025-2026
 - Developed responsive web applications using WordPress, HTML, CSS, JavaScript, React, Node.js, and Express.js.
 - Customized WordPress themes and templates to meet client requirements while maintaining a consistent user experience.
 - Built and updated website pages, layouts, and reusable sections with a focus on responsiveness across desktop and mobile devices.
 - Collaborated with team members to implement design changes, content updates, and new website features.
 - Performed website maintenance, bug fixing, and testing to ensure reliable performance and compatibility across modern browsers.

PROJECTS

- **Travel Planner | UI/UX Case Study**
 - Designed an end-to-end travel planning platform that helps users discover destinations, plan itineraries, manage budgets, and organize trips in one place.
 - Conducted UX research, created user flows, wireframes, and high-fidelity prototypes to improve the overall trip planning experience.
 - Built a scalable design system using Figma with reusable components, Auto Layout, variables, and responsive layouts for consistency.
 - Designed key user journeys including destination exploration, trip management, booking flow, itinerary planning, and budget tracking.
